11 February 1960

MEMORANDUM FOR: SA/CR

SUBJECT : Status of Study on Logging Practices

1. As requested, the problem of determining the minimal requirements for logging classified intelligence information reports to meet the provisions of E.O. 10501 and which would be approved by the Office of Security, is presently under study by a Working Committee of the Central Reference Advisory Group (CRAG).

2. The draft study awaiting approval by the Working Committee will recommend that the OCR receipt and dissemination record be considered the official CIA log and that the continuation of office and divisional (or lower eschelon) logs appears unwarranted for this purpose.

3. Comments from the Office of Security have not been requested but an informal opinion will be obtained.
